

## Integrated solution for your solar and storage projects

On-site solar power generation is one of the fastest growing energy improvements in the commercial & industrial segments. Redaptive's expertise in scaling energy projects across distributed real estate portfolios simplifies this journey for our customers.

**~15%**

Annual customer savings in many markets

**~70%**

Commercial buildings have capacity for solar projects

**^10%**

Increased commercial electricity rate since 2021

## PARTNER WITH US FOR KEY BENEFITS

### Energy improvements beyond solar

Employ our strategic and comprehensive Energy-as-a-Service solutions to add benefits beyond solar with metering, lighting, HVAC, and electric vehicle projects, enabling maximum energy savings and sustainability.

### One flexible contract

Leverage our single-packaged contract to service all technologies in addition to solar & storage at multiple locations. Experience shorter and negotiable term options with performance-based payments.

### Simplified and accelerated implementation

Save your resources by letting us help you manage all aspects of the project including analysis, engineering, scheduling, construction, safety, incentives, and interconnection across all sites.

### No up-front capital

With Power Purchase Agreement (PPA) structure, customers can implement solar & storage projects without capital expense while we cover cost, execution risks and provide on-going maintenance throughout the term.

## TAKE ADVANTAGE OF ECONOMIC REWARDS

- » Hedge against utility inflation
- » Attractive state incentives
- » Rate escalation as low as 0%
- » Can be paired with roof repairs
- » Monetize tax & depreciation benefits
